Data backup and restore services: Can be scheduled weekly, biweekly, monthly or on demand. The first 15gig is flat rated and additional data is incremented in 5gig blocks. We can schedule backups for anytime, and write data to DVD for reliable recovery. We can even store your data off site for you & recover from our vault to you via email.

Workstation downtime or slow performance can cost you plenty. We will come in and perform routine maintenance checks to help keep you running smoothly. We flat rate each workstation at .45min. So you know what your costs are up front. If we find potential problems we will update you so you make the decisions about what to do.

Server downtime can cripple your business productivity. We will come in and perform server health checks and routine maintenance checks to help avoid expensive surprises. We flat rate each server at 2 hours so you know what your costs are up front. If we find potential problems we will update you so you make the decisions about what to do.

Network cabling and wiring can be your businesses best friend if managed properly. We can install maintain and modify your infrastructure cabling and appliances (hubs, routers, UPS, etc...) for optimum performance. This is done on an as needed bases.

Keeping your data safe is a major responsibility, and we are experts at it. We can help you keep your information within your organization while allowing your workers to access email, internet, and other external sources required to conduct your business. We can help protect you from external hackers & malware attacks, at a fraction of the cost of hiring a security officer. This service is purchased in 1 hour blocks for ea router and firewall, and 45min blocks for each workstation you designate.

Web Design for new site builds is flat rated for the first 5 pages with less than 18 images total. Site will be constructed to convey your style and business personality. No generic cookie cutter web sites here. Call for current pricing.
